

AMENDMENTS TO THE CLAIMS:

This listing of the claims will replace all prior versions and listings of claims in the present application. Please amend, without prejudice, the claims in the current application as provided below in the Listing of the Claims.

LISTING OF THE CLAIMS:

1. (Currently Amended) A bumper for a motor vehicle, comprising:
an outer bumper part; and
an inner bumper part including a base part and at least one side crosspiece positioned at an angle to the base part, regions of a transition from the base part to the side crosspiece configured so that deformation of the inner bumper part occurs in a predetermined direction in response to a force applied to the bumper, the region of the transition from the base part to the side crosspiece including a ridge pointing in a desired direction of deformation, wherein the outer bumper part is connected to the inner bumper part.
2. (Currently Amended) The bumper according to claim 1, wherein the ridge includes has a triangular cross-section.
3. (Original) The bumper according to claim 1, wherein the inner bumper part includes two side crosspieces.
4. (Original) The bumper according to claim 3, wherein the side crosspieces are aligned parallel to each other.
5. (Original) The bumper according to claim 3, wherein the side crosspieces are aligned substantially horizontal in an installed state.
6. (Original) The bumper according to claim 1, wherein the transition from the base part to at least one side crosspiece includes a radius.
7. (Original) The bumper according to claim 6, wherein the ridge is arranged in a region of the radius.
8. (Original) The bumper according to claim 1, wherein the ridge extends over a substantial part of a width of the inner bumper part.
9. (Currently Amended) A bumper for a motor vehicle, comprising:

outer bumper part means; and
inner bumper part means including base part means and side
crosspiece means positioned at an angle to the base part means, the inner
bumper part means including means in regions of a transition from the
base part means to the side crosspiece means for deforming the inner
bumper part means in a predetermined direction in response to a force
applied to the bumper, the deforming means including ridge means
pointing in a desired direction of deformation, wherein the outer bumper
part means is connected to the inner bumper part means.
